Substrate Preparation	Remove putty-burs and fill cavities in render/plaster. Remove adherent oil films (extruder remnants) from profiles.
Consumption	per meter: 1 m
Installation	Select the Capatect-Sockelschiene according to the insulation board thickness. Mark the base line by chalk line. Fix the base rail using components of the Capatect Montage set. Max distens of anchors: 30 cm. Elongated mounting holes facilitate an exact alignment.
	Use base rail connectors for exact distance to the subsequent profile and alignment . Fill substrate irregularities with the Capatect spacers in the right thickness before final knock-in of the anchors.
